## Use Case - Sourcing specialist professionals

Monti Tyres Ltd. (a tyre manufacturer) has signed up a large vehicle manufacturer. They are undergoing an essential IT upgrade to optimize their production line. Despite being initially planned for completion two months ahead of the contracted shipment date, the project saw unforeseen snags, including the exit of Sachin, who was overseeing and implementing this upgrade.

Unchecked, these developments have the potential to push the projected go-live date to two months after the shipment date incurring business damages to Monti Tyres

The best replacement for Sachin was a good 6 months away and other candidates were sub-par. The target shipment date was just 4 months away. Monti's CIO thought to go with 'interim talent' strategy and on-boarded Surinder Singh from Integre Solutions to meet the IT & business objectives.

Relevantly experienced, Surinder diligently oversees project progress, fosters collaboration with OEMs and vendors, conducts frequent quality assessments, and ensures team motivation. The IT project is now on course for timely optimisation of Monti's production line.
